---

## EDUCATION

**Georgia Institute of Technology**, Atlanta, Georgia — May 2028
*Bachelor of Science in Computational Media* — *GPA: 3.93*
*Concentration: Interaction Design and Computer Intelligence*

**Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence, Computer Organization & Programming, Discrete Mathematics, Linear Algebra, Computational Media, Objects & Design, Robotics

## TECHNICAL SKILLS

**Design & Creative Tools:** Figma, Adobe Illustrator, Adobe Photoshop, Blender, Procreate, Clip Studio Paint
**Development:** Unity, C#, C, HTML/CSS, JavaScript, React, Python
**Collaboration:** Git, GitHub, Kanban, VS Code

## PROJECTS

**PopSign –** Undergraduate Researcher and Product Designer

- Conducting UX research and user testing for an interactive ASL learning experience, using participant feedback to improve usability, engagement, and overall user experience.
- Designing and prototyping interaction flows and UI concepts for a Unity-based experience that uses AI-powered hand recognition to provide real-time feedback.

**Unraveling –** Game Development Lead

- Pitched an original game concept to 140+ prospective contributors, generating strong interest and building a multidisciplinary project team of 100+ members across programming, design, art, narrative, UI/UX, audio, animation, & VFX.
- Leading cross-functional development of a Unity/C# game, translating project vision into priorities, technical requirements, and actionable workstreams while coordinating collaboration through GitHub and Kanban.
- Conducting UX research and playtesting, translating player feedback into iterative improvements to gameplay and usability.

**Social Scenarios Simulator –** Full-Stack Developer

- Built a full-stack web application that allows users to practice interactive social and professional scenarios, including behavioral interviews, career fairs, networking events, and group projects.
- Integrated a RAG-based system using a vector database and OpenAI's API to generate context-aware responses.
- Built interface and backend using Django, Python, JavaScript, HTML/CSS, and Bootstrap, and deployed on PythonAnywhere.

**Baking Papa –** Full-Stack Developer

- Developed Baking Papa, an AI-powered recipe recommendation experience in Unity that uses the Gemini API to dynamically recommend recipes based on available ingredients, time constraints, and cooking experience.
- Designed an interactive, kitchen-inspired interface and created visual assets using Figma, Procreate, and Clip Studio Paint to create a playful and intuitive user experience.
- Used AI-assisted development tools to prototype, test, and refine recommendation logic and the overall product experience.

## WORK EXPERIENCE

**CS 1301 PLUS Leader,** Atlanta, GA – *Peer Instructor* — Aug 2026 – Present

- Leading biweekly Python review sessions for 50+ students, developing PowerPoint presentations and interactive activities to reinforce programming fundamentals, problem-solving, and exam preparation.
- Supporting 100+ students during weekly lectures by answering questions on course material and assignments.

**Unique Jewel**, Atlanta, GA – Web Developer/Marketing Lead — Aug 2023 – Present

- Developing a customer-facing website using React, JavaScript, HTML/CSS, and Vercel, translating business and customer needs into digital experiences that strengthen engagement.
- Supporting 200+ annual sales and ~$15K in annual revenue through web development and digital marketing initiatives.

## LEADERSHIP AND COMMUNITY ENGAGEMENT

**GT Girls Who Code**, Executive Board Member — Jan 2026 – Present

- Coordinating general body meetings, career workshops, and volunteer events, averaging 40+ attendees per event.
- Managing Instagram, LinkedIn, and Slack communications for 200+ active members and a social audience of 1,000 followers.
