

End User Persona

Background:

- Computer Science Undergraduate Student
- Name: Elliot Huang
- Age: 21
- Major: Computer Science(BS)
- Year: 4th year (Senior)
- Location: Atlanta, GA (Georgia Tech Atlanta Campus)
- Education Level: University Undergraduate
- Technical Skills: Advanced
- Social Confidence: Low

Tag Line:

- “A strong programmer learning to find his voice”

End User Persona – About Elliot

Elliot is a fourth-year Computer Science student who is deeply engaged in the technical side of his field. He consistently earns strong grades, excels in programming assignments, actively participates in hackathons, and regularly builds personal projects outside of class. Among his peers, he is known for his technical ability and strong problem-solving skills.

However, despite appearing well-rounded academically, Elliot struggles with interpersonal communication. He finds it difficult to initiate conversations, maintain small talk, and navigate group dynamics. These challenges have affected his ability to connect with peers, collaborate effectively on group projects, network at career events, and perform confidently in behavioral interviews.

Although Elliot prepares extensively for technical interviews, he often leaves behavioral interviews feeling frustrated and disappointed, knowing he could have communicated his experiences more effectively. He sometimes replays conversations in his head afterward, thinking about what he should have said instead.

Elliot understands that technical expertise alone is not enough to succeed in the industry. While he feels confident writing code, he feels significantly less confident explaining his ideas, advocating for himself, or engaging socially in professional settings. He wants to build his social confidence and develop stronger communication skills so he can expand his career opportunities and feel more comfortable in collaborative environments.

End User Persona – About Elliot

Experience Level with Similar Products:

- Comfortable using web apps and chat systems
- Has experience with other similar learning platforms
- Frequently interacts with LLM-powered tools for coding

Goals:

- Practice social and professional communication in a structured environment.
- Prepare for events that require complex social interaction (career fair, group projects, behavioral interviews).
- Learn strategies to start and maintain engaging and personal conversions with professionals and peers.
- Get tailored evidence-based feedback on his own communication styles

Frustrations:

- Currently does not feel comfortable initiating on holding conversion for prolonged periods of time.
- He feels overwhelmed in group settings.
- Lacks opportunities to practice professional communication during real time events.

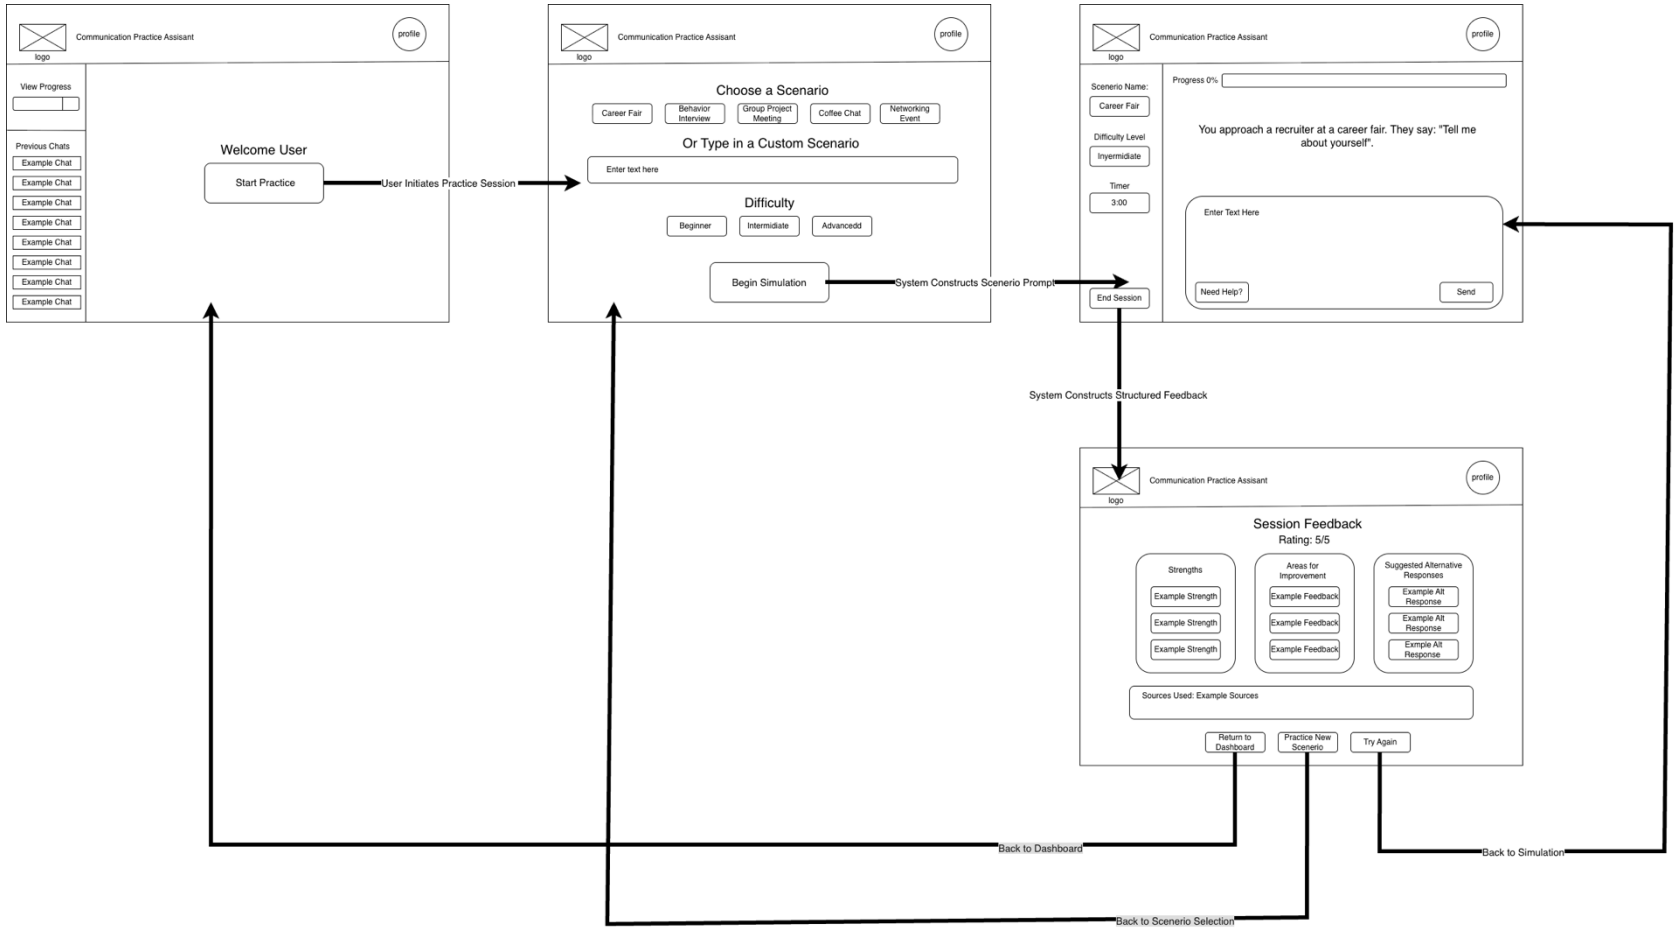

Quotes:

- “I wish I had a way to practice conversations before they actually matter.”

Custom User Stories

1. As an End User (CS student), I want to practice simulated social scenarios (e.g., career fairs, group project meetings, networking events, behavioral interviews), so I can build confidence before real-world interactions.
2. As an End User, I want to be able to upload files (resumes, event fliers, etc.) to be able to have custom-catered predicted situations made for me to practice social interaction.
